FRONT-END PROJECTS

My portfolio website: Recently just created my portfolio with beautiful JavaScript library React JS, HTML, CSS3, JavaScript. This portfolio website has fully functioned features of download as well as E-mail feature & most important this website mobile & tab responsiveness makes it awesome to notice-on.

Netflix Clone with JavaScript: A project which i recently created is Netflix clone, Where I used HTML, CSS, JavaScript and API service to make this project work on.

GPT-3 Website: React JS Framework I used to create this GPT-3 website project, where we used the Highly CSS ingredients to make this web beautiful as well as React help us to make this web flaunt to work on.

Weather App: A weather app which demonstrates weather functionality as well as give specific data about pollution level in the specific location. This weather app created with HTML, CSS, JavaScript and additionally API to collect the information.

Other than this 3+ small app which I have completed.

SERVER-SIDE PROJECTS

- **Employee Management System:** A project which manages all the employee details in an organization. Projects helps to perform CRUD Operation on Employee Database.

SDFC Banking System: In this specific Project we used postman to create REST Api and perform all the Withdrawal, Deposit & Update Operation using Oracle Database.

Student Management System: A project which build on Spring & Spring boot to manage the whole Student details using Oracle Database.
